

Editorial Note

On behalf of the editorial board, I am proud to announce launching of the first issue in the second year of IJATR (Volume 2 Issue 1). Along with the regular articles, this issue includes selected papers from 2nd International Conference on Computational Methods in Engineering and Health Sciences (ICCMEH- 2015), 19-20 December 2015, Universiti Putra Malaysia, Selangor, Malaysia. The sincere efforts of our associate editor Dr. Mohammed Zuber in this regard are gratefully acknowledged. I also express my deep gratitude to our reviewers, who, despite their busy schedule, have promptly finished the review tasks in a careful manner. While thankfully acknowledging the contributions of the authors, I humbly request feedback from readers and colleagues for the growth of IJATR.

Dr. M. Abdul Mujeebu
Founder and Chief Editor
